Modifying VPN Connection in VZAccess Manager

Open VZAccess Manager but do not connect. Click Tools and then click Preferences.

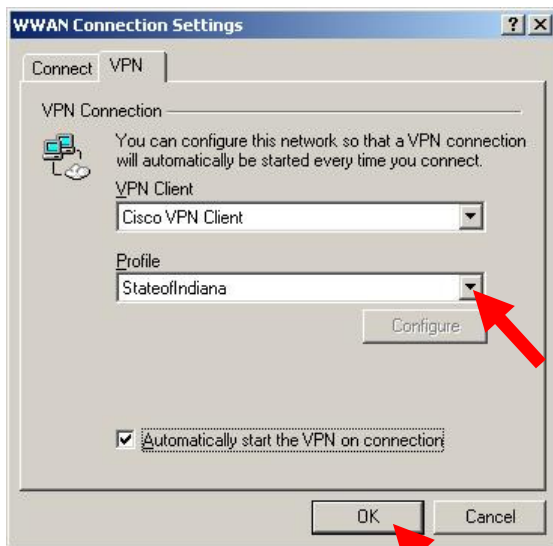

On the WWAN Tab, click Set Options.

NOTE: To prevent the VPN from automatically connecting when VZ Access connects, be sure to uncheck "Automatically connect".

Click on the VPN Tab.

On the VPN Tab, click the Profile dropdown box. Select StateOfIndiana in the dropdown box. Click Ok.

NOTE: To prevent the VPN from automatically connecting when VZ Access connects, be sure to uncheck "Automatically start the VPN on connection.
